MST BLOCKCHAIN HACKATHON // SIMPLE PITCH DECK

Universal Multi-Asset Hub

A secure digital platform on MST Blockchain to issue, verify, and trade real-world assets: College Degrees, Carbon Credits, and Land Titles with zero fraud.

WHAT IS IT?

Real-World Asset Hub

One simple website where universities issue fake-proof degrees, companies buy real green carbon offsets, and people buy land safely.

Fake-Proof | Easy to Use

TEAM

Built for everyone with simple, clear technology.

Fully Working Demo

POWERED BY

MST Blockchain

Ultra-fast (~3 seconds), extremely cheap transaction fees, and works directly with BridgeKey Wallet.

3-Sec Speed | MSTC Coin

THE REAL WORLD PROBLEM

The 3 Big Problems We Solve

Important real-world documents are easy to fake, double-use, or sell illegally today.

PROBLEM 1

Fake College Degrees

People create fake paper or PDF degrees to get jobs. Normal crypto tokens can be sold to anyone—which is bad because a student should never be able to sell their degree to someone else!

Degrees Cannot Be Resold

PROBLEM 2

Fake Carbon Offsets

Companies claim they helped the environment by buying green credits. But the same credit is often sold or used multiple times because there is no permanent proof of retirement.

Burn Credit = Real Proof

PROBLEM 3

Selling Land Under Bank Loans

Fraudsters sometimes sell land to innocent buyers while the land still has an unpaid bank loan or court dispute. Buyers lose money and get trapped in legal battles.

Lock Land During Loan

OUR SOLUTION

Three Smart Rules for Three Types of Assets

Instead of treating everything like a simple crypto coin, we give each asset the exact real-world legal rules it needs.

LOCKED TO STUDENT

College Degrees

When a university issues a degree, it is locked forever to the student's wallet. It can never be transferred or sold, but anyone can verify it instantly online.

BURN TO RETIRE

Carbon Credits

Companies can trade green credits. When ready to claim an offset, the credit is permanently burned on-chain, creating a digital proof receipt that cannot be reused.

BANK LOCK SUPPORT

Land Ownership Titles

Digital property deeds. When an owner takes a bank loan, the land registrar locks the deed. While locked, it cannot be transferred or sold until the loan is paid off!

Only Verified Organizations Can Create Assets

Only government-recognized universities, certified carbon auditors, and official land offices are given permission to issue these documents.

100% Verified Issuance

HOW IT WORKS

Simple 4-Step System Design

Built so ordinary people and institutions can use it easily without needing blockchain expertise.

STEP 1

Clean Website

Open the dashboard in your browser. Shows all your degrees, land deeds, and carbon credits in one single portfolio view.

Easy Dashboard

STEP 2

Safe Cloud Storage

Heavy documents like marksheets, land maps, and audit reports are saved safely on Pinata IPFS cloud storage so they never get lost.

Permanent Storage

STEP 3

Smart Rules

Programs on the blockchain automatically enforce the safety rules (lock degrees, freeze mortgaged land, burn used carbon credits).

Automatic Safety

STEP 4

MST Blockchain

All transactions are permanently confirmed on MST Blockchain in only 3 seconds for almost zero fee.

Fast & Cheap

WHY MST BLOCKCHAIN?

Fast, Cheap & Built for Everyone

Old blockchains like Ethereum are slow and charge high fees. MST Blockchain solves this completely.

4,000+

ACTIONS PER SECOND

Can handle thousands of university students or land transactions at the same time without slowing down or crashing.

~3 Sec

CONFIRMATION SPEED

Instant degree verification and fast property buying without waiting minutes or hours for confirmation.

Penny Fees

CHEAP TO USE

Anyone can issue or verify documents for just pennies using the native MST Coin (MSTC).

MST NETWORK	CHAIN ID NUMBER	PURPOSE	STATUS
MST Testnet	91562037	Free testing environment for developers and students	Live & Connected
MST Mainnet	4646	Production network for real business and government use	Ready for Launch

WALLET INTEGRATION

Simple Login with BridgeKey Wallet

Supports the official BridgeKey Wallet made by Masterstroke Technosoft as well as MetaMask.

1-CLICK LOGIN

Automatic Wallet Detection

The website automatically finds your BridgeKey extension or mobile wallet. If you prefer MetaMask, it supports that too with zero conflicts.

BridgeKey Official Support | MetaMask Supported | No Password Needed

AUTOMATIC SETUP

1-Click Network Setup

No complicated settings! When you click Connect, the website automatically configures MST Testnet (Chain ID 91562037) directly inside your wallet in 1 click.

1-Click Auto Setup | Verified Chain ID 91562037 | Real-time Balance

WHAT CAN YOU DO ON THE SITE?

Four Complete Working Features

Everything is already built, working, and ready to use in the live demo.

FEATURE 01

College Degree Portal

Universities can issue tamper-proof degrees with marksheet attachments. Employers can verify diplomas with 1 click.

FEATURE 02

Carbon Offset Proof

Companies buy carbon credits and burn them permanently to get an official, non-transferable green offset receipt.

FEATURE 03

Land Deed Lock

Property owners hold their digital land deeds. When they take a bank loan, the deed is locked to prevent fraud.

FEATURE 04

Safe Marketplace

Buy and sell clean land titles and carbon credits directly using native MST Coin with safe automatic payments.

TESTED & VERIFIED

Smart Programs & Tested Security

7 programs deployed and tested with 100% passing tests.

PROGRAM NAME	SIMPLE PURPOSE	STATUS
AuthorityRegistry	Controls who is allowed to issue degrees, land, and carbon credits	Verified
AcademicDegreeCertificate	Issues locked college degrees that cannot be stolen or sold	Verified
CarbonCreditBatch	Manages certified green carbon credits	Verified
CarbonRetirementReceipt	Issues permanent proof receipts when a credit is burned	Verified
LandOwnershipTitle	Manages digital land deeds with bank loan locks	Verified
UniversalMarketplace	Handles safe buying and selling in MST Coin	Verified

13 out of 13 Automated Security Tests Passed

Every single action (preventing transfers of degrees, locking mortgaged land, burning credits) has been automatically tested and verified.

100% Passing Tests

REAL IMPACT

Who Will Use This?

Helps colleges, environmental projects, banks, and everyday property owners.

Colleges

FOR UNIVERSITIES & STUDENTS

Colleges eliminate fake certificates forever. Students get a permanent digital diploma they can share with any employer in the world instantly.

Green ESG

FOR SUSTAINABILITY

Companies get clear, honest proof of their carbon reduction. Nobody can accuse them of greenwashing because the proof is permanently on-chain.

Real Estate

FOR HOME BUYERS & BANKS

Banks get guaranteed loan security. Buyers know the property is 100% legal with zero hidden disputes or surprise bank liens.

OUR PLAN

Next Steps & Future Vision

Clear, realistic steps to take this from hackathon project to a widely used platform.

PHASE 1 (DONE)

Working Demo

- 7 Programs Deployed
- BridgeKey Wallet Connected
- Safe Document Uploads
- Live Website Deployed

PHASE 2 (SOON)

Real Pilots

- Partner with 1st College
- Launch on MST Mainnet
- Full Professional Audit
- Easy Mobile App Support

PHASE 3

Sensors & Maps

- Real environmental sensors
- Satellite maps for land plots
- Automatic green reporting

PHASE 4

Easy Loans

- Take small loans against land
- Green reward programs
- Nationwide registry connect

PROJECT RECAP

Universal Multi-Asset Hub

Making real-world assets safe, honest, and easy on MST Blockchain.
